

Saturday, January 10, 2009 (file cac184)

To: Dan Breedon

Fr: Ed Miller

Subj: Backup images to support e-mail cac 183

Enclosed find images from two papers that were part of cac183 Ref A from WorldWatch. These were scanned at 600 dpi into my photoshop elements Version 5 editor and outputed as a backup. You can view them by restoring using photoshop with all the bells and whistles associated with data base management or simply viewed them as .jpg images using other software. In some cases you may want to zoom in slightly to make the text or graphs more readable. I have sent a copy to Marti in Forest Ranch in preparation for a meeting with locals on inputs to the general plan. You may want to pass this CD to Chuck, Tim or DCS. For a wider distribution we probably should contact EarthWatch for permission.
