

Policy Input Provided by Butte County Department of Water & Resource Conservation on Policy Alternatives Document

Comments Concerning Goals and Policy Development

Water Resource Policies/Programs as recommended by the CAC (Policies provided for under #17.o of the policy document) should be discussed at the draft General Plan stage, where programs and implementation measures will receive more attention. The Goals and Policies as recommended by the Water Commission and Planning Commission should remain for final approval by the Board of Supervisors at their Study Sessions concerning Goals and Policy Development.

General Comments:

Ensure that various Goals and Policies include cross-referencing that can be grouped by responsible departments (eg. Recreational water use tied to water resource policies)

After Butte County General Plan 2030 adoption, Development Services staff should hold a round of meetings with appropriate departments around specific programs and implementation measures where multiple responsibilities and needs can be communicated and effectively handled.

The Draft General Plan should help to define vision statements for Butte County General Plan 2030 and its various Elements.
