County staff will work with Chico and Oroville housing staff to increase the supply of affordable housing in the incorporated cities and their spheres of influence since infrastructure and services are limited in the Unincorporated Area. The cities and County will consider applying for State or federal funds jointly. - ◆ *Page 205, Section II.B, Goals, Policies, and Actions.* Revise Policy COS-P3.7 as follows: “Wind power generation facilities, solar power generation facilities, and other alternative energy facilities shall be conditionally permitted in the Agriculture, Agriculture Services, Timber Mountain, Industrial and Public land use designations, provided that ~~such facilities will not degrade the natural environment~~ significant adverse environmental impacts associated with such development can be successfully mitigated.”
- ◆ *Pages 205 to 206, Section II.B, Goals, Policies, and Actions.* Revise Action COS-A3.1 as follows: “Prepare ~~an~~ a countywide Alternative Energy Promotion Study that will include the following:
 - ◆ Identify possible sites and resources for the production of energy using local renewable resources such as solar, wind, small hydro, and biogas.
 - ◆ ~~Consider the potential need for exemption of alternative energy facilities from other General Plan 2030 policies concerning visual resources, ridgeline protection, and biological resources.~~
 - ◆ Evaluate potential land use, environmental, economic, and other constraints affecting renewable energy development.
 - ◆ Identify measures to protect renewable energy resources such as utility easements, rights-of-way, and land set-asides.
 - ◆ Evaluate the feasibility of Community Choice Aggregation (CCA) for the County. CCA allows cities and counties, or groups of them, to aggregate the electric loads of customers

within their jurisdictions for purposes of procuring electrical services. CCA allows the community to choose what resources will serve their loads and can significantly increase renewable energy. If CCA is ultimately not pursued, evaluate the feasibility of purchasing renewable energy certificates to reduce the County's contribution to GHG greenhouse gas emissions related to County electricity use.

- ◆ ~~Propose a ministerial~~ Evaluate permit processes for approval of small-scale wind and solar energy systems for on-site home, small commercial, and farm use.”
- ◆ *Page 207, Section II.B, Goals, Policies, and Actions.* Revise Action COS-A4.3 as follows: “Institute County purchasing policies that ~~require~~ give preference to the purchase of energy-efficient products, products that contain recycled materials, and products that reduce waste generated when feasible.”

Section III, Air Quality

- ◆ Pages 208 to 209, Section III.A, Background Information. Revise the paragraph that extends across these two pages as follows: “~~The CARB and the US Environmental Protection Agency (EPA) have~~ has designated Butte County as a nonattainment area for the ~~State 1-hour and federal and State 8-hour ozone standards.~~ For the federal PM_{2.5} standard, the EPA has designated the lower elevations of the county as a nonattainment area, while the upper foothills are classified as attainment areas. For the carbon monoxide standard, the EPA has classified the Chico Urbanized Area as a moderate maintenance area, while the rest of Butte County is classified as an unclassified/attainment area. Butte County is in attainment for the federal PM₁₀, nitrogen dioxide, and sulfur dioxide standards.

CARB has designated Butte County as a moderate nonattainment area for the State 1-hour ozone standard and as a nonattainment area for the State 8-hour ozone, PM₁₀, and PM_{2.5} standards. For the State PM₁₀ and PM_{2.5} standards, CARB has designated the county as a nonattainment area. In December 2008, the EPA designated most of Butte County as a nonattainment area for the federal PM_{2.5}, 24-hour standard, and is expected to finalize this designation in late 2009. Butte County is an in attainment area for the federal and State carbon dioxide, nitrogen dioxide, and sulfur dioxide standards.”

Section IV, Biological Resources

- ◆ *Page 219, Section IV.A, Background Information.* Add a new Section IV.A.5 as follows:

“5. Fish Species

Butte County was historically one of the centers of wild salmon and steelhead, and the multitude of species dependent upon them, in the State of California. Oroville Dam ended the massive salmonid runs on the Feather River. Butte Creek and Big Chico Creek are the only undammed tributaries left in Butte County that support wild strains of endangered spring-run Chinook salmon and steelhead. Little Butte Creek and Dry Creek also support runs of critically designated steelhead. Although recovery efforts have boosted the population over the last 15 years, recent runs have declined significantly. Most measures show an average count of wild Butte Creek spring-run Chinook salmon of nearly 10,000 fish per year from 1998 to 2008. However, in 2009 only 2,561

fish returned to Butte Creek and a handful to Big Chico Creek.¹ Nevertheless, Butte Creek supports the largest run of wild, naturally spawned, spring-run Chinook salmon in California.² Protecting these last strongholds for these species is critical to our society.

¹ California Department of Fish and Game Surveys.

² Butte County General Plan 2030 Setting and Trends Report, 2006.”

- ◆ *Page 220, Section IV.B, Goals, Policies, and Actions.* Add the following new action as Action COS-A6.2: “Work with Butte Creek Canyon residents and local groups toward adopting a planning strategy for a Butte Creek Canyon overlay. The purpose of the planning strategy is to facilitate the protection and preservation of the historical and ecological foundation of Butte Creek Canyon, including the survival of salmon, steelhead, and other sensitive plants and animals such as the East Tehama Deer Herd, preservation of historical sites and ecological preserves, and the optimum balance of recreation and residential use.”

Section V, Timber Resources

- ◆ *Page 227, Section V.B, Goals, Policies, and Actions.* Revise Policy COS-P11.1 as follows: “The County supports ~~local, State, and federal legislation designed to protect timber resources and promote~~ and promotes sustainable timber production.”
- ◆ *Page 227, Section V.B, Goals, Policies, and Actions.* Delete Policy COS-P11.4 as follows: “~~As standard review under the California Environmental Quality Act, the County shall review timber harvest plans.~~”

Section VI, Mineral and Soil Resources

- ◆ *Pages 228 to 229, Section VI.A, Background Information.* Revise the paragraph that extends across these pages as follows: “Gold is also mined in Butte County. The main form of gold mining in Butte County has been placer mining, although underground mining took place historically. Placer mining involves removing the surface gold-bearing gravels, and either washing or chemically extracting the gold ore from the gravel. There are no permitted placer mines in Butte County, although the Department of Fish and Game regulates suction dredge mining within the county’s creeks and rivers. In addition, buried placer deposits can be obtained through drift mining, which involves digging into the ground and tunneling horizontally to extract the gravels. Another kind of gold mining is lode mining, which often involves open pit mines and blasting mountains to expose deep veins of gold. Examples of lode gold mines in Butte County include the Blue Lead, Ohio Dix, and Carr mines. Buried placer deposits are located throughout the county and are not easily identified. ~~The New Era Mine near Dry Creek is an example of an active placer gold mine.~~”
- ◆ *Page 232, Section VI.B, Goals, Policies, and Actions.* Revise Action COS-A12.1 as follows: “Apply zoning regulations permitting extraction and processing as a conditional use on any lands classified by the State Mining and Geology Board as Mineral Resource Zone 2 (MRZ-2) or Scientific Zone (SZ).”

Section IX, Scenic Resources

- ◆ *Page 250, Section IX.B, Goals, Policies, and Actions.* Add a new Action COS-A17.1 as follows:
“Adopt development guidelines that limit ridgeline development near scenic resources.”

Chapter 11, Health and Safety Element

Section II, Flood Hazards and Dam Inundation

- ◆ *Page 262, Section II.A.1, Floodplains.* Revise the last full paragraph on this page as follows: “In addition to the hazard areas listed above, flooding in Rock Creek and Keefer Slough, located north of Chico, occurred on several occasions in the 1980s, 1990s, and 2000s, inundating State Routes 99 and 32 and several County roadways, as well as impacting extensive residential and agricultural areas around Chico and the unincorporated community of Nord. In addition, Dry Creek-Cherokee Canal poses a flood risk to the Richvale area, including rice research grounds, rice storage, and chemical storage facilities.”
- ◆ *Page 273, Section II.B, Goals, Policies, and Actions.* Revise Policy HS-P2.4 as follows: “Development projects on lands within the 100-year flood zone, as identified on the most current available maps from FEMA, shall be allowed only if the applicant demonstrates that it will not:
 - a. Create danger to life and property due to increased flood heights or velocities caused by excavation, fill, roads and intended use.
 - b. Create difficult emergency vehicle access in times of flood.
 - c. Create a safety hazard due to the height, velocity, duration, rate of rise, and sediment transport of the flood waters expected at the site.
 - d. Create excessive costs in providing governmental services during and after flood conditions, including maintenance and repair of public facilities.
 - e. Interfere with the existing water conveyance capacity of the floodway.
 - f. Substantially increase erosion and/or sedimentation.
 - g. Contribute to the deterioration of any watercourse or the quality of water in any body of water.
 - h. Require significant storage of material or any substantial grading or substantial placement of fill that is not approved by the County through a development agreement, discretionary permit, or other discretionary entitlement; a ministerial permit that would result in the construction of a new residence; or a tentative map or parcel map.
 - i. Conflict with the provisions of the applicable requirements of Government Code Sections 65865.5, 65962 or 66474.5.

Section III, Seismic and Geologic Hazards

- ◆ *Page 285, Section III.B, Goals, Policies, and Actions.* Revise Action HS-A6.1 as follows: “~~Develop and implement a program to encourage residents~~ Continue to require applicants to seismically retrofit existing homes where required under existing building codes.”

Section IV, Fire Hazards

- ◆ *Page 294, Section IV.B, Goals, Policies, and Actions.* Replace Action HS-A12.2 as follows: “~~Develop a mapped inventory of water resources available for fire fighting and provide maps to out of area firefighters.~~ Develop a standard method of physically identifying water sources using reflectors, signs, or other methods visible from roads and travel routes. Water source identification is an ongoing process accomplished locally by individual fire departments and fire stations.”

Section VI, Parks and Recreation

- ◆ *Pages 328 to 329, Section VI.B, Goals, Policies, and Actions.* Change Action PUB-A6.1 to instead be Policy PUB-P6.6: “Utilize Community Facilities Districts, Mello-Roos and/or landscaping and lighting districts to provide funding for on-going maintenance and operation of parks and recreation facilities in medium density (six dwelling units per acre) and higher density residential developments when warranted.”
- ◆ *Page 329, Section VI.B, Goals, Policies, and Actions.* Revise Action PUB-A7.1 as follows: “~~Identify strategies for the County to assist~~ Assist special districts with strategies for funding, planning, and support for recreation and park facility development. ◆ Magalia Changes:

- Clean-ups to about a dozen subdivided areas in Magalia. These subdivisions crossed over the boundary of the Magalia Study Area (Study Area #5) and this resulted in a subdivision receiving two General Plan 2030 designations. For instance, many of these subdivisions received two designations, one that matched the Board's direction for Study Area #5, Rural Residential, and another, Timber Mountain, which applied outside the Study Area boundary. All of these areas change from Timber Mountain

to Rural Residential so that each subdivision receives one designation under General Plan 2030 and one zone under the new Zoning Map. These areas are as follows:

- 065-080-005, -006, -008, -010, -011, -012, -014, -015, -016, -021, -036, -038, -039; 065-100-004, -005, -008 through -013, -015, -018, -020, -021, -026 through -034, -036, -037, -039 through -044 (Study Area #5 boundary issue).

In addition, County staff directed the following changes:

- ◆ Remove the Retail Overlay from the Nord area.
- ◆ Add 20 acres of High Density Residential to the North Chico Specific Plan Village Core area, as directed by the Board of Supervisors at the January 2010 Board of Supervisors Study Sessions. Approximately 16 acres are changed from MDR to HDR, and approximately 4 acres are changed from MHDR to HDR.
