

## **22 STUDY AREA 22: EXISTING CITY OF OROVILLE LIMITS**

There are three study areas that encompass the city limits of Chico, Oroville and Biggs. These study areas were included so that anticipated growth could be considered for the county as a whole; however, there are no land use alternatives for these study areas, and they were therefore not evaluated. The City of Gridley and the Town of Paradise do not expect significant growth within their existing city limits; they were therefore not included in the study areas.

Study Area 22, Existing City of Oroville Limits, spans the City of Oroville and includes the entire area within the City's boundaries. According to city staff, there is likely to be growth within the City. The City of Oroville is under its own jurisdiction and regulates growth according to the City's General Plan. The preferred alternative for the City of Oroville's General Plan update calls for approximately 3,500 new units by 2030.
